

Positions in CSS

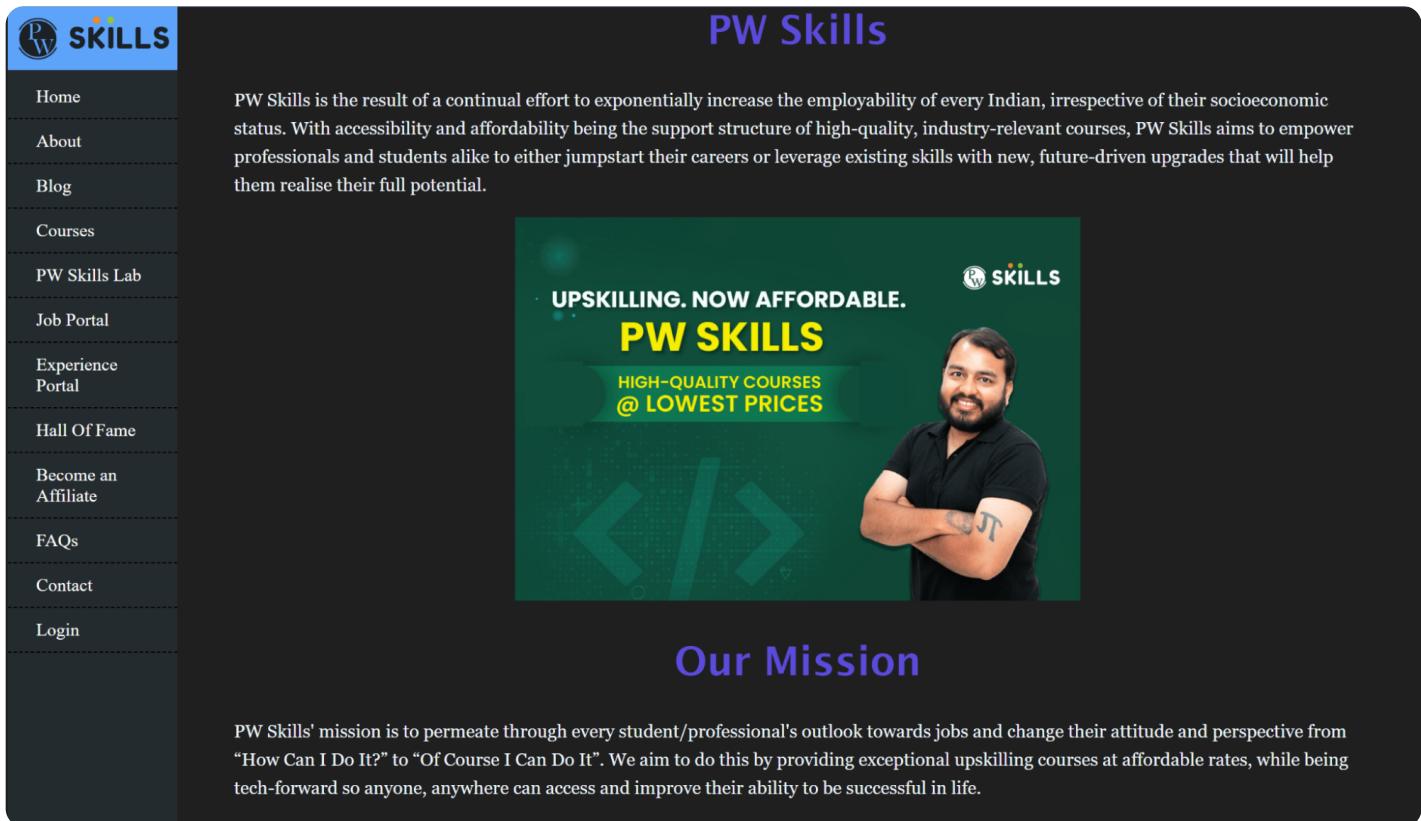

Assignment

Assignment

1. Create a simple webpage as shown in the below image.

- The webpage must be in dark mode.
- The webpage must have a sidebar to the left with navigation Links.
- The output must be achieved using the CSS float property and no CSS position property except float must be used.

The screenshot shows a dark-themed website for PW Skills. On the left is a vertical sidebar with a blue header containing the PW Skills logo. Below the logo are ten menu items: Home, About, Blog, Courses, PW Skills Lab, Job Portal, Experience Portal, Hall Of Fame, Become an Affiliate, FAQs, Contact, and Login. The main content area has a dark background with a central image of a smiling man with a beard, wearing a black t-shirt with a tattoo on his left arm. To his left, text reads "UPSKILLING. NOW AFFORDABLE." and "PW SKILLS HIGH-QUALITY COURSES @ LOWEST PRICES". Below the image are two large, light-blue chevron arrows pointing left and right. The title "Our Mission" is centered at the bottom of the main content area. A paragraph of text below it discusses the mission of PW Skills.

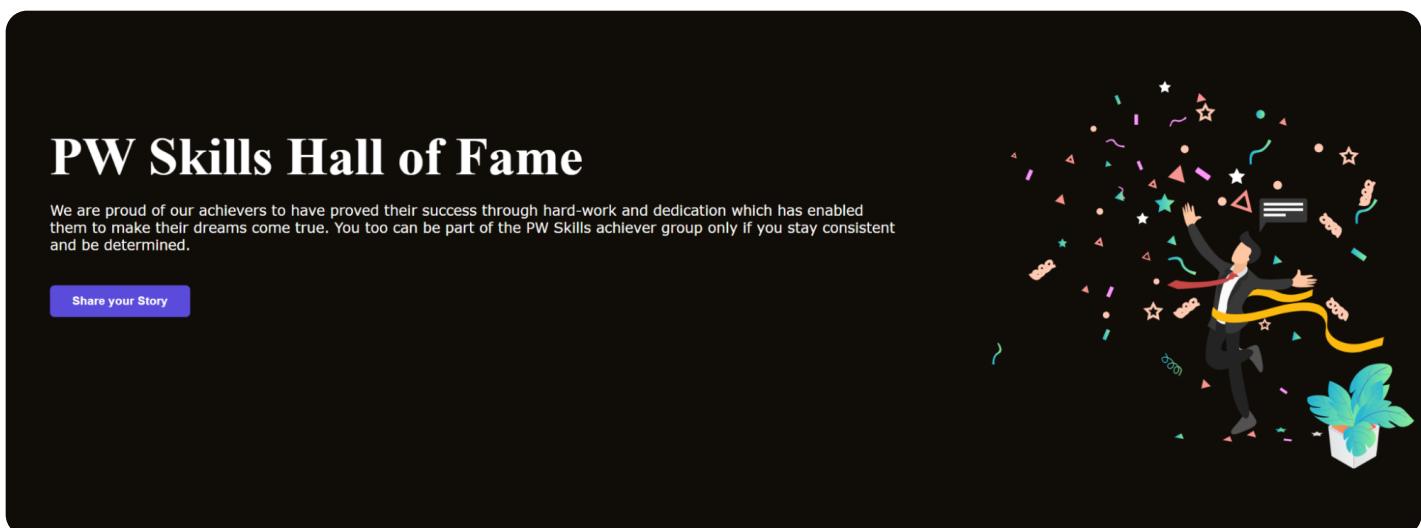

PW Skills is the result of a continual effort to exponentially increase the employability of every Indian, irrespective of their socioeconomic status. With accessibility and affordability being the support structure of high-quality, industry-relevant courses, PW Skills aims to empower professionals and students alike to either jumpstart their careers or leverage existing skills with new, future-driven upgrades that will help them realise their full potential.

Our Mission

PW Skills' mission is to permeate through every student/professional's outlook towards jobs and change their attitude and perspective from "How Can I Do It?" to "Of Course I Can Do It". We aim to do this by providing exceptional upskilling courses at affordable rates, while being tech-forward so anyone, anywhere can access and improve their ability to be successful in life.

2. Create a simple webpage as shown in the below image.

- The webpage must contain a content section and image.
- The content section with a heading, paragraph, and button must be aligned to the left and the image must be aligned to the right of the webpage.
- The output must be achieved using the CSS float property and no CSS position property except float must be used.

The screenshot shows a dark-themed page for the PW Skills Hall of Fame. At the top is a large, bold heading "PW Skills Hall of Fame". Below the heading is a paragraph of text encouraging users to share their stories. To the right is an illustration of a person in a suit, holding a trophy, surrounded by confetti and celebratory elements like balloons and streamers. The overall theme is recognition and achievement.

We are proud of our achievers to have proved their success through hard-work and dedication which has enabled them to make their dreams come true. You too can be part of the PW Skills achiever group only if you stay consistent and be determined.

Share your Story

3. Create a simple webpage as shown in the below image.

- The webpage must contain a card with some images and text.
- The card contains two columns below. Use CSS float property to achieve the outcome. No table must be used.

The official logo of the latest version, HTML5.

Filename extension	.html .htm
Internet media type	text/HTML
Type code	text/HTML
Uniform Type Identifier (UTI)	public.html
Developed by	WHATWG
Initial release	1993; 30 years ago
Latest release	HTML5
Type of format	Document
Container for	HTML elements
Contained by	Web browser
Extended from	SGML
Extended to	XHTML
Open format?	Yes
Website	html.spec.whatwg.org

4. Create a simple course detail page as shown in the below image.

- The course offer banner must always be at the top even if the user scrolls down the page.
- Add the course name, thumbnail, and some information about the course until the webpage is scroll enabled.

Full Stack web development 2.0

FULL STACK WEB DEVELOPMENT 2.0
HINGLISH SIGMA 2.0 (BATCH)

Learn complete web stack programming with React and Node by doing it the way a full-stack professional would do it. Learn how to create whole web apps from start to finish with one of the most trending tech stacks available. You can learn how to create data-driven applications, as well as how to test, protect, and deploy your code, in this thorough study path. MERN stack is one of the most versatile tech stacks available. Learn front-end and server-side support, to build a multi-platform solution.

5. Create a button as shown in the below image.

Assignment

6. Create a simple webpage as shown in the image below.

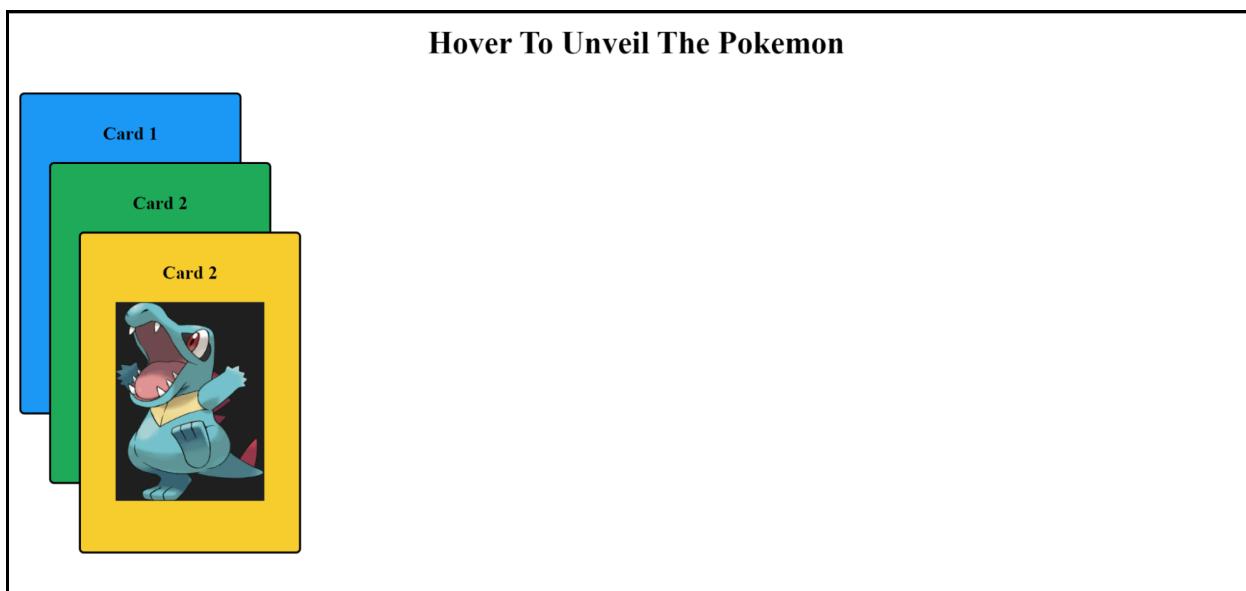

- The webpage must be similar to what we have done in assignment 01.
- Add a chatbot image at the bottom right end of the webpage.
- The chatbot should be in the same position all the time.

The screenshot shows the PW Skills homepage. On the left is a vertical navigation bar with links: Home, About, Blog, Courses, PW Skills Lab, Job Portal, Experience Portal, Hall Of Fame, Become an Affiliate, FAQs, Contact, and Login. The main content area has a dark background. At the top right is the 'PW Skills' logo. Below it is a green banner with white text: 'UPSKILLING. NOW AFFORDABLE.', 'PW SKILLS', and 'HIGH-QUALITY COURSES @ LOWEST PRICES'. To the right of the banner is a portrait of a smiling man with a tattoo on his arm. At the bottom of the page is the heading 'Our Mission' and a paragraph about the company's mission to provide affordable upskilling courses.

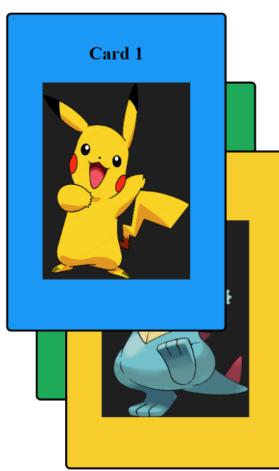

7. Create a simple Pokemon game as shown in the image below.

- Initially, the webpage must display some hidden cards with a Pokemon image on them.
- On hovering a card, that particular card must be displayed on the top so that the Pokemon image is visible.
- Use z-index to achieve this output.

The screenshot shows a simple web-based game titled 'Hover To Unveil The Pokemon'. It features a stack of three cards. The top card is yellow and displays a blue and red cartoon dragon-like creature. The middle card is green and labeled 'Card 2'. The bottom card is blue and labeled 'Card 1'. The text 'Hover To Unveil The Pokemon' is centered above the cards.

Hover To Unveil The Pokemon

8. Study about the webpage modals and build a simple modal as shown image below.

9. Design a customized dropdown menu as shown in the below image.

- Initially, there should be a message displayed saying "Hover to show the dropdown". You can use the span tag or button tag to achieve this.
- Once hovering the dropdown menu should be visible and there should be a horizontal scroll to view all the options.
- You can achieve this by using the max-height property to restrict the height of the drop-down and the overflow property to get the vertical scroll bar to navigate between items.

10. Create a simple terms and conditions pop-up as shown in the below image.

- The pop-up should be a modal similar to what we have built-in question number 08.
- The terms and conditions must be inside a separate section that has a vertical scrollbar to navigate and read the complete content.
- Add a checkbox and a button at the end.
